## Introduction

### 1. Welcome to Duksung

Duksung Women's University is a private university of the nation founded by Ms. Cha Mirisa, the independence fighter, women's rights activist and the leader of women's education.

Duksung Women's University is the “university to develop practical women leaders to create the world”.

The future of Korea depends on how many progressive, competent and strongly responsible women can be developed. Duksung will fulfill this role.

For this, Duksung is;

Firstly, designing mid- to long-term future by 2050 with development strategies based on characteristics of a women's university. By opening courses that enable entire students to develop gender perspectives and using Human Resources Development Institute, we are designing customized education for students to accentuate the characteristics of Duksung, such as allowing students to actively explore their specialties

and careers from the time of entrance and to improve international communication abilities through International Language Center, etc.

Secondly, making gradual advancement towards the goal to become the highest education-centered university. We are achieving quality improvement of education by introducing linked major system, substantiating the curricula of major and liberal arts subjects and expanding seminar education in order to develop professionals equipped with the humanistic attainments as the tradition of Duksung.

Thirdly, creating the greatest democratic university based on the structure to accommodate opinions and diverse communication systems. Through network activation and system, we are creating strong and beautiful 'power' to serve as the foundation for advancement of Duksung by gathering the creative effort and passion of all Duksungians, such as professors, students, staffs and alumni.

Now, realize your infinite dreams in Duksung Women's University, the 'birth place of practical women leaders to create the world' and the 'most beautiful university in Seoul'.

PRESIDENT  
DUKSUNG WOMEN'S UNIVERSITY
